The expected cash flows will include cash flows from the the cash flows that the Company expects to receive, discounted at an approximation of the difference between the contractual cash flows due in accordance with the contract and all not held at fair value through profit or loss. sale of collateral held or other credit enhancements that are integral to the contractual The Company recognizes an allowance for expected credit losses for all debt instruments Expected credit losses are based on the

Expected credit losses are recognized in two stages.

- For credit exposures for which there has not been a significant increase in credit risk from default events that are possible within the next 12-months. since initial recognition, expected credit losses are provided for credit losses that result
- the remaining life of the exposure, irrespective of the timing of the default. since initial recognition, a loss allowance is required for credit losses expected over For those credit exposures for which there has been a significant increase in credit risk

experience, adjusted for forward-looking factors specific to the debtors and the economic instead recognised a loss allowance based on lifetime expected credit losses at each reporting calculating expected credit losses. The Company does not track changes in credit risk, but For trade receivables and contract assets, the Company applies a simplified approach in environment. The Company has established a provision matrix that is based on its historical credit loss

vii. Derivative financial instruments

Initial recognition and subsequent measurement

subsequently re-measured at fair value at the end of each reporting date. recognized at fair value on the date on which a derivative contract is entered into and are hedge its foreign currency risks. Such derivative financial instruments the fair value is negative. carried as financial assets when the fair value is positive and as financial liabilities when The company uses derivative financial instruments, such as forward currency contracts to Derivatives are

d) Inventories

Inventories are valued at lower of cost or net realizable value

Cost comprises invoice value plus attributable direct expenses

Net realizable value is based on estimated selling price less any further costs expected to be incurred for disposal.

Notes to the Financial Statements for the year ended 31 March 2022

e) Foreign currency transactions

currencies are translated into United States Dollars at the rate of exchange ruling at the exchange ruling on the date of the transaction. Assets and liabilities expressed in foreign balance sheet date. Resulting gain or loss is taken to the Statement of Comprehensive Transactions in foreign currencies are converted into United States Dollars at the rate of

f) Impairment of non-financial assets

financial asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the company estimates the asset's recoverable amount. The company assesses at each reporting date whether there is an indication that a non-

amount, the asset is considered impaired and is written down to its recoverable amount. Where the carrying amount of an asset or cash generating units exceeds its recoverable

impaired asset. Comprehensive Income in those expense categories consistent with the function of the Impairment losses of continuing operations are recognized in the Statement of

loss was recognized. assumptions used to determine the asset's recoverable amount since the last impairment A previously recognized impairment loss is reversed only if there has been a change in the Such reversal is recognized in the Statement of Comprehensive

g) Provision

the obligation, and the amount can be reliably estimated result of a past event, it is probable that an outflow of resources will be required to settle Provisions are recognized when the company has a legal or constructive obligation as a

market assessments of the time value of money and the risks specific to the obligation settle the obligation at the end of the reporting period, using a rate that reflects current Provisions are measured at the present value of the expenditures expected to be required to

that reimbursement will be received and the amount of receivable recovered from a third party, a receivable is recognized as an asset if it is virtually certain When some or all the economic benefits required to settle a provision are expected to be can

h) Leases

The Company as lessee

Short-term leases and leases of low value assets

leases and leases of low-value assets are recognized as expense on a straight-line basis commencement date and do not contain a purchase option). Lease payments on short-term The Company applies the short-term lease recognition exemption to its short-term leases over the lease term. (i.e., those leases that have a lease term of 12 months or less from the
