Sharda Cropchem Limited

Rating reaffirmed at 'Crisil A1+'

Rating Action

Total Bank Loan Facilities Rated	**Rs.456 Crore**
Short Term Rating	**Crisil A1+ (Reaffirmed)**

Note: None of the Directors on Crisil Ratings Limited's Board are members of rating committee and thus do not participate in discussion or assignment of any ratings. The Board of Directors also does not discuss any ratings at its meetings.
1 crore = 10 million
Refer to Annexure for Details of Instruments & Bank Facilities

Detailed Rationale

Crisil Ratings has reaffirmed its 'Crisil A1+' rating on the short-term bank facilities of Sharda Cropchem Ltd (SCL).

The rating continues to reflect the healthy business risk profile of SCL, driven by healthy product registrations, dominant presence in the regulated markets of Europe and North America Free Trade Agreement (NAFTA), and strong financial risk profile. These strengths are partially offset by inherently working capital-intensive operations that peak during January-March, and susceptibility of operations to uneven monsoon and regulatory changes inherent in the agricultural chemicals (agro-chem) industry.

Post a healthy recovery of 37% in revenues witnessed in fiscal 2025 to Rs.4,322 crore, growth momentum continued in this fiscal as well aided by robust growth across its key export regions. Revenues during first nine months of fiscal 2026 increased by 29% to Rs.3,203 crore from Rs.2,491 crore in corresponding period of previous fiscal led by volume growth of ~21% and impact of forex fluctuation of ~9% while realization remained largely flattish. Agrochemical segment (87% of sales) grew by 34% Rs.2,790 crore in first nine months of fiscal 2026 (first nine months of fiscal 2025: Rs.2,082 crore) driven by demand uptick witnessed across all key export regions viz Europe, NAFTA, Latin America (LATAM), Rest of the world (Row). Growth in non-agrochemical segment (13% of revenues) was constrained at 1% to Rs. 413 crore from Rs.409 crore largely owing to muted revenue from NAFTA region (66% of non agrochem sales) while other regions witnessed some growth. Revenues this fiscal are estimated to increase by 20-25% over previous fiscal. Over the medium term, given their strong global presence and healthy pipeline of products under registration, revenues are expected to grow by 8-10%.

Gross margins expanded by nearly 500 bps to 35% in first nine months of fiscal 2026 from 30% in corresponding period of previous fiscal mainly owing to lower input costs. Owing to higher gross margins and higher operating leverage, operating margins further improved to 18.4% in first nine months of fiscal 2026 (first nine months of fiscal 2025:12.9%) SCL is estimated to achieve over 18% - 19% EBIDTA margins for the full fiscal 2026 with Q4 being seasonally strongest quarter. Over the medium term, margins expected to sustain at 18% to 19% mainly driven by stable input cost and operating leverage benefits and stable input costs.

SCL has been consistently investing in product registrations. In the first nine months of fiscal 2026, it spent Rs 399 crore on product registrations, funded through internal accruals. The company will continue investing in product registrations to build a pipeline for sustained growth.

The financial risk profile should remain healthy, backed by a healthy tangible networth of Rs 2,676 crore as on September 30, 2025 and a debt-free balance sheet. Healthy cash surplus and accrual should suffice to cover the capital expenditure (capex) and incremental working capital requirement. Liquidity is supported by estimated unencumbered cash surplus of about Rs 694 crore as on December 31, 2025.

Analytical Approach

Crisil Ratings has combined the business and financial risk profiles of SCL and its subsidiaries as all the entities, collectively referred to as the Sharda group, are engaged in the same business and managed by common promoters.

Please refer Annexure - List of Entities Consolidated, which captures the list of entities considered and their analytical treatment of consolidation.

Key Rating Drivers - Strengths

Strong market position, driven by wide geographic reach, increasing product registrations and growing presence in highly regulated markets: SCL operates in over 80 countries and remains unimpacted by downturn in demand in any particular geography. It has an established global marketing and distribution network with more than 525 third-party distributors and 500+ sales force. It has developed a robust network of suppliers and has ensured low reliance on any particular supplier.

SCL has a large supplier base in China, wherein no single supplier accounts for 3-5% of sales. The company has a large product portfolio, comprising over 3,004 agro-chem registrations as on December 31, 2025, and no single molecule contributing more than 10% of revenue. SCL derives its competitive advantage from identifying key molecules going off patent and getting them registered in various markets globally. Continued investment in registrations across various countries globally should help the company expand its customer base over the medium term.

Healthy financial risk profile: Tangible networth was large at Rs 2,676crore as on September 30, 2025, and is expected to increase over the medium term with steady accretion to reserves. SCL has a debt-free balance sheet leading to strong capital structure. It mainly utilizes non-fund-based facilities to fund its raw material imports. Given near debt free balance sheet, interest coverage has been strong historically and is likely to remain healthy over the medium term. Cash accruals, along with yearly cash accrual, should be sufficient to meet yearly capex (for new registrations) of Rs 450-500 crore over the next 2-3 fiscals.

Key Rating Drivers - Weaknesses

Working capital-intensive operations: SCL has a larger working capital requirement, vis-à-vis its peers, due to its wide product portfolio and geographical reach. Inventory is sizeable, given the seasonality in the geographies the company operates in. Additionally, there are substantial receivables from certain overseas customers, especially in LatAm. However, LATAM accounted for only 7-9% of revenue for the first nine months of fiscal 2026. Working capital requirement is largely funded via internal accrual, ensuring NIL utilisation of the fund-based limit and relatively low utilisation (~12%) of the non-fund based limits during the nine months ending December 31, 2025. Any significant stretch in the working capital cycle could impact cash flow temporarily and hence, remains a monitorable.

Susceptibility to risks inherent in the agro-chem industry: The agro-chem industry, particularly exports, remains sensitive to changes in government policies and regulatory environment in end-user countries. Every country imposes stringent regulatory requirements on companies launching new products. Changes in regulations could increase the variety of tests and data required, and make it more difficult for exporters to obtain registrations. The agro-chem sector is also sensitive to uneven patterns of monsoon across the globe.

Liquidity Strong

Liquidity is marked by healthy consolidated unencumbered liquid surplus of Rs.694crore as on December 31, 2025 and a near debt-free balance sheet. The company is expected to generate net cash accrual of Rs 670-700 crore in fiscal 2026 and Rs 720-740 crore in fiscal 2027. This, along with the liquid surplus, will suffice to fund working capital & capex requirements. The unutilized fund-based limit of Rs 25 crore offered an additional cushion to liquidity.

Rating Sensitivity Factors

Downward Factors

- Significant reduction in revenue coupled with moderation in operating margin also impacting ROCE (below 9-11%)
- Increase in TOL/TNW above 1.2-1.3 times on sustained basis due to stretch in working capital or any major debt funded capex.

About the Group

SCL was formed in 2004, by merging two proprietorships, Sharda International and Bubna Enterprises, founded in 1987 and 1988, respectively. The company deals in generic agrochemical (84% of overall sales), with dyes and intermediates and conveyor belts accounting for the balance. In 2004, SCL set up Sharda International FZE (SI), a Dubai-based wholly owned subsidiary. In 2012, SI was merged with SCL. A new entity, Sharda International DMCC, was formed in fiscal 2013 , which is now redomiciled in the Dubai Airport Freezone, and renamed Sharda International FZCO effective June 2024.

As on December 31, 2025, the Sharda group had 3,004 registrations. Additionally, it has filed 1,076 applications for registrations globally, which are pending at different stages. The group is present across the entire agro-chem value chain with 525+ third-party distributors and over 500+ sales personnel, serving clientele in more than 80 countries.

About Crisil Ratings Limited (A subsidiary of Crisil Limited, an S&P Global Company)

Crisil Ratings pioneered the concept of credit rating in India in 1987. With a tradition of independence, analytical rigour and innovation, we set the standards in the credit rating business. We rate the entire range of debt instruments, such as bank loans, certificates of deposit, commercial paper, non-convertible/convertible/partially convertible bonds and debentures, perpetual bonds, bank hybrid capital instruments, asset-backed and mortgage-backed securities, partial guarantees and other structured debt instruments. We have rated over 33,000 large and mid-scale corporates and financial institutions. We have also instituted several innovations in India in the rating business, including ratings for municipal bonds, partially guaranteed instruments and infrastructure investment trusts (InvITs).

Crisil Ratings Limited ('Crisil Ratings') is a wholly-owned subsidiary of Crisil Limited ('Crisil'). Crisil Ratings Limited is registered in India as a credit rating agency with the Securities and Exchange Board of India ("SEBI").
